TAKE OVER.

through the **WALL**.

TAKE OVER is an initial
condition looking for conse-
quences.

WHAT IS THIS NOT?

Everything asks to be contin-
ued.

Enter anywhere.

Change what follows.

image → voice → sound
→ person → practice
→ relation → next

an initial condition.

0. INITIAL CONDITION.

A photographic sequence of abandoned churches, damaged architectures, bodies, apertures, and objects whose meaning changes as they carry on, frame to frame.

Beside and within the photographic work, encoded portals open another layer: voices, field recordings and other sounds. The image does not explain; the sound does not close it. Each can spark another connection.

TAKE OVER begins from what remains. We inherit architectures, images, memories, relationships, sounds, and debris. It asks what can begin inside spaces opened by something else. Community is a process.

TAKE OVER

interactive in progress / extinction in progress

There is a church. More precisely, there is what remains of one: stone, apertures, funerary inscriptions, broken surfaces, light, acoustic cavities. Before *church* became the name of a building or institution, *ekklesia* named an assembly—people called together. Here the architecture remains. The ecclesia does not. This is our initial condition.

TAKE OVER begins from what remains and asks what can happen next. A photographic sequence moves through abandoned churches, bodies, openings, and objects whose meaning changes frame to frame. A square appears. At first it has no known function. Exposed, carried, displaced, and observed, it moves from signal to token to code to portal. The image does not explain the sound; the sound does not close the image; a voice does not resolve the photograph. Each produces another possible direction.

image → voice → sound → person → practice → relation → next.

The project approaches community as an irreversible system: not an object, a sum of individuals, or consensus, but an evolving configuration of relations. Ave Palm, Mai-Brit Tānava, Kenn-Eerik Kannike, and Andrés A. León Baldelli / kumiori III remain attributable authors. Difference remains visible while relations grow.

The open call gives us fifteen photographic positions. We allocate twelve and reserve three—twenty percent of the wall—for contributions that have not surfaced yet:

$$12 + \square + \square + \square = 15.$$

Vacancy is not outside the work. It is an active variable. Photographs lead through provisional QR portals toward voices, field recordings, sound, and an evolving digital surface. The wall is not simply where the work is shown; it is another initial condition.

TAKE OVER does not restore the vanished assembly or reconstruct a previous order. It asks whether another assembly can emerge from the remains without absorbing those who enter. Someone enters. Something changes. Another possibility becomes admissible. The configuration changes again. **TAKE OVER THE WALL. TAKE OVER THE OPENING.**

**TAKE OVER THE SOUND.
TAKE OVER WHAT FOLLOWS. PASS IT ON.**

rationale *n.* From what remains: architectures, images, memories, relationships, sounds, and debris. TAKE OVER asks what can begin inside spaces opened by something else. — Community is not presented as a stable object but as a process. Photography opens to voice; voice opens to sound. Sound opens to another person; another person brings another practice. The work grows through these relations.

Deriv. *image-to-voice; voice-to-sound; sound-to-person; person-to-practice; practice-to-relation; relation-to-next.*

church *n.* A gathered body; also, the place in which it gathers. In TAKE OVER, the church is an inherited architecture of assembly, memory, vacancy, and return: a photographed threshold that holds what remains while making room for another voice, another sound, another relation.

An initial condition looking for consequences. Everything asks to be continued. Enter anywhere. Change what follows.

$$7 + 5 + \dots = 12$$

initial allocation

$$12 + \square + \square + \square = 15$$

positions reserved for what has not surfaced yet

THE WALL IS THE INITIAL CONDITION.

The exhibition combines photographic works by the initial contributors with small QR portals connecting selected works to voices, sound, and the evolving digital surface. It does not attempt to fill every available position. Some positions remain unallocated: scarce exhibition space is reserved for contributions that have not surfaced yet.

FIG. 1 / PROPAGATION THROUGH WALL, PASSAGE, SOUND, AND PROJECTED IMAGE.

IMAGE IS NOT ENOUGH TO CARRY.

The QR portal opens another perspective from in-
side the frame.*

1.

WHAT GROWS BETWEEN THEM IS THE WORK.

$$\mathcal{W}_t = \{w_1, w_2, \dots, w_n\}, \quad \mathcal{R}_t \subseteq \mathcal{W}_t \times \mathcal{W}_t, \quad \mathcal{G}_t = (\mathcal{W}_t, \mathcal{R}_t).$$

$\mathcal{W}_t$ is the set of attributable contributions present at time t : images, voices, sounds, bodies, places,

and practices. $\mathcal{R}_t$ is not subtraction and not another object. It is a set of ordered pairs. Writing $(w_i, w_j) \in \mathcal{R}_t$ means that an encounter lets w_i alter the possible continuation of w_j . The relation can be added, changed, or removed; therefore $\mathcal{R}_t$ is not fixed in advance. $\mathcal{G}_t$ names the state of TAKE OVER at that moment: distinct contributions together with the relations currently active between them.

Attributable authors, ordered alphabetically by surname: Kenn-Eerik Kannike; Andrés A. León Baldelli / kumiori III; Ave Palm; and Mai-Brit Tänäva. Their contributions remain distinct while entering relation.

Take over the wall.

Take over the oven.

Take over the sound.

Take over the restaurant.

Take over the night.

Take over the surface.

UNALLOCATED IS NOT EMPTY.

Not because material is missing. Because somebody is.

WHO ENTERS NEXT?

LISTEN.

Sound is location and grounding. Some QR portals carry recordings made at or in relation to the photographed sites; others carry voices or composed material. Kenn-Eerik Kannike develops the sonic trajectory through recordings, listening, and live electronic concert.

2. THE OPENING CHANGES THE EXHIBITION.

cert, live sound, performance, food, and night are possible consequences, not requirements. Each practice enters as someone brings it. Something happens. There is an interval. What follows is changed by it.

CURRENT STATE.

ELEMENT	CONDITION	STATUS
PHOTOGRAPHS	initial sequence	SELECTED
AVE	photographic contribution	IN PROGRESS
VOICE	initial contribution	AGREED
SOUND	field recordings / collaboration	AGREED
WEB SURFACE	operational prototype	IN DEVELOP- MENT
QR / PORTAL	concept / visual language	ESTABLISHED
UNALLOCATED	photographic and exhibition space	OPEN

3.

WHAT IS FIXED / WHAT IS OPEN.

FIXED $\cap$ OPEN

unfinished exhibition = finished capacity to change.

Fixed: the initial photographic material; the applicant; the first two Cc; the critical mass;

attributable authorship; physical works linked to digital portals; space left available for others.

Open: who enters next; which practices they bring; which relations emerge; how the opening propagates; what the wall causes.

4. INSTABILITY / FRACTURE / OPENING.

Andrés A. León Baldelli / kumiori is a Paris-based researcher in theoretical mechanics and applied mathematics working at CNRS, and a photographer working across image, place, bodies, and experimental forms of interaction.

His scientific work studies instability, fracture, and irreversible processes: systems in which a small perturbation can alter the trajectory of what follows.

His photographic practice approaches similar questions through another language: what remains, what changes, what passes between people, and what new structures can emerge from an opening.

TAKE OVER brings these practices into contact without attempting to collapse one into the other.
