TAKE OVER.

verb, imperative: an invitation to care.

take → care → open

0. INITIAL CONDITION.

A community gallery is offered through a competition. Many practices enter; one proposal is selected. This application begins by accepting that condition, then introduces one small perturbation: selection need not terminate the trajectories of the others.

We propose a photographic work that behaves as a living relation. Images lead to people. People bring voices, sounds, places, practices and further people. The exhibition is not conceived as a terminal object but as an activation surface.

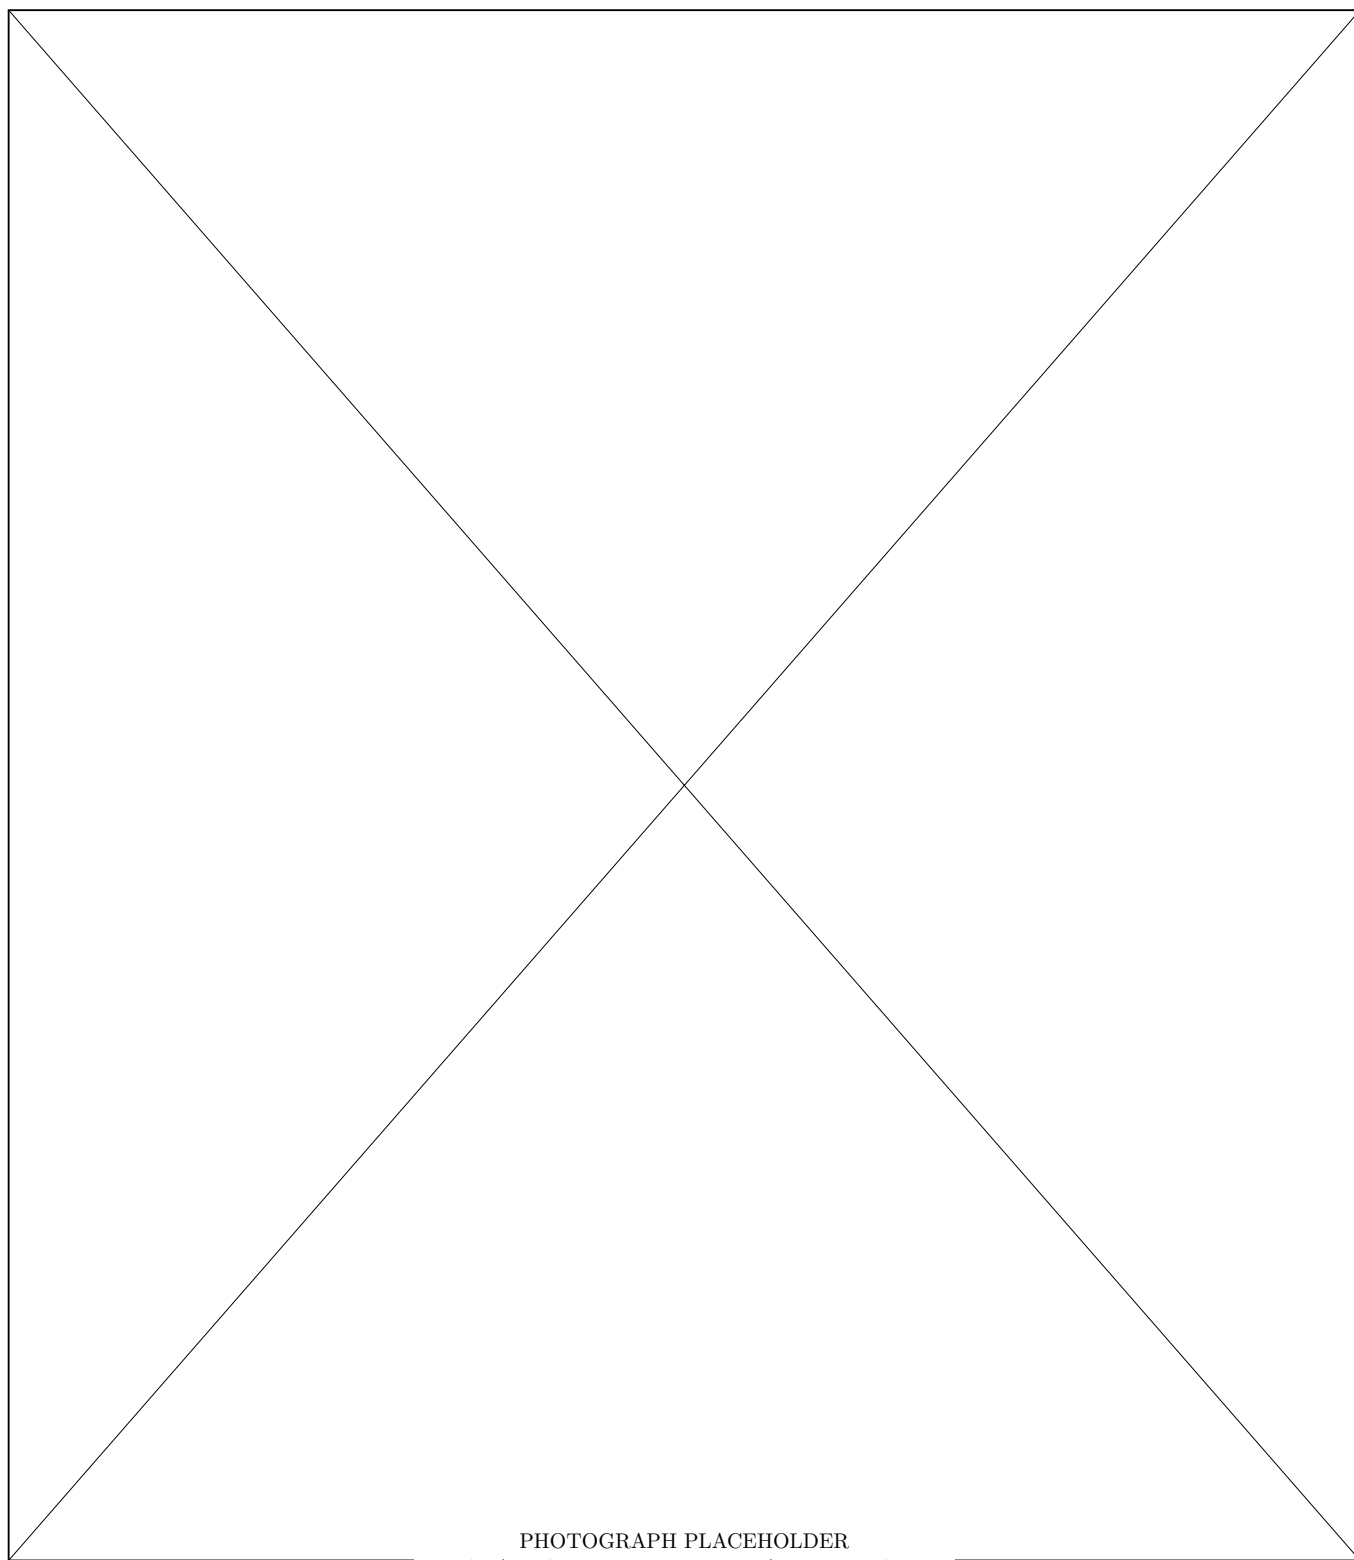

This temporary text exists only to test hierarchy, density, rhythm and the transition between scientific argument, photographic evidence and invitation.

$$N \longrightarrow 1$$

conventional selection

$$1 \longrightarrow 1 + 1 \longrightarrow 1 + 1 + 1 \longrightarrow \dots$$

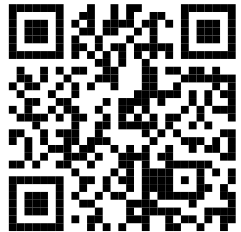

propagation

A BODY ENTERS A SPACE WHOSE FORMER FUNCTION HAS DISAPPEARED.

THE IMAGE DOES NOT SPEAK ALONE.

*“Temporary voice text. What remains
in a photograph when the photographed
person speaks back? What does the im-
age remember, and what does it omit?”*

LISTEN

1. A COMMUNITY IS NOT A FLAT GRAPH.

$$\mathcal{G} = (V, E_{\text{image}}, E_{\text{sound}}, E_{\text{place}}, \dots)$$

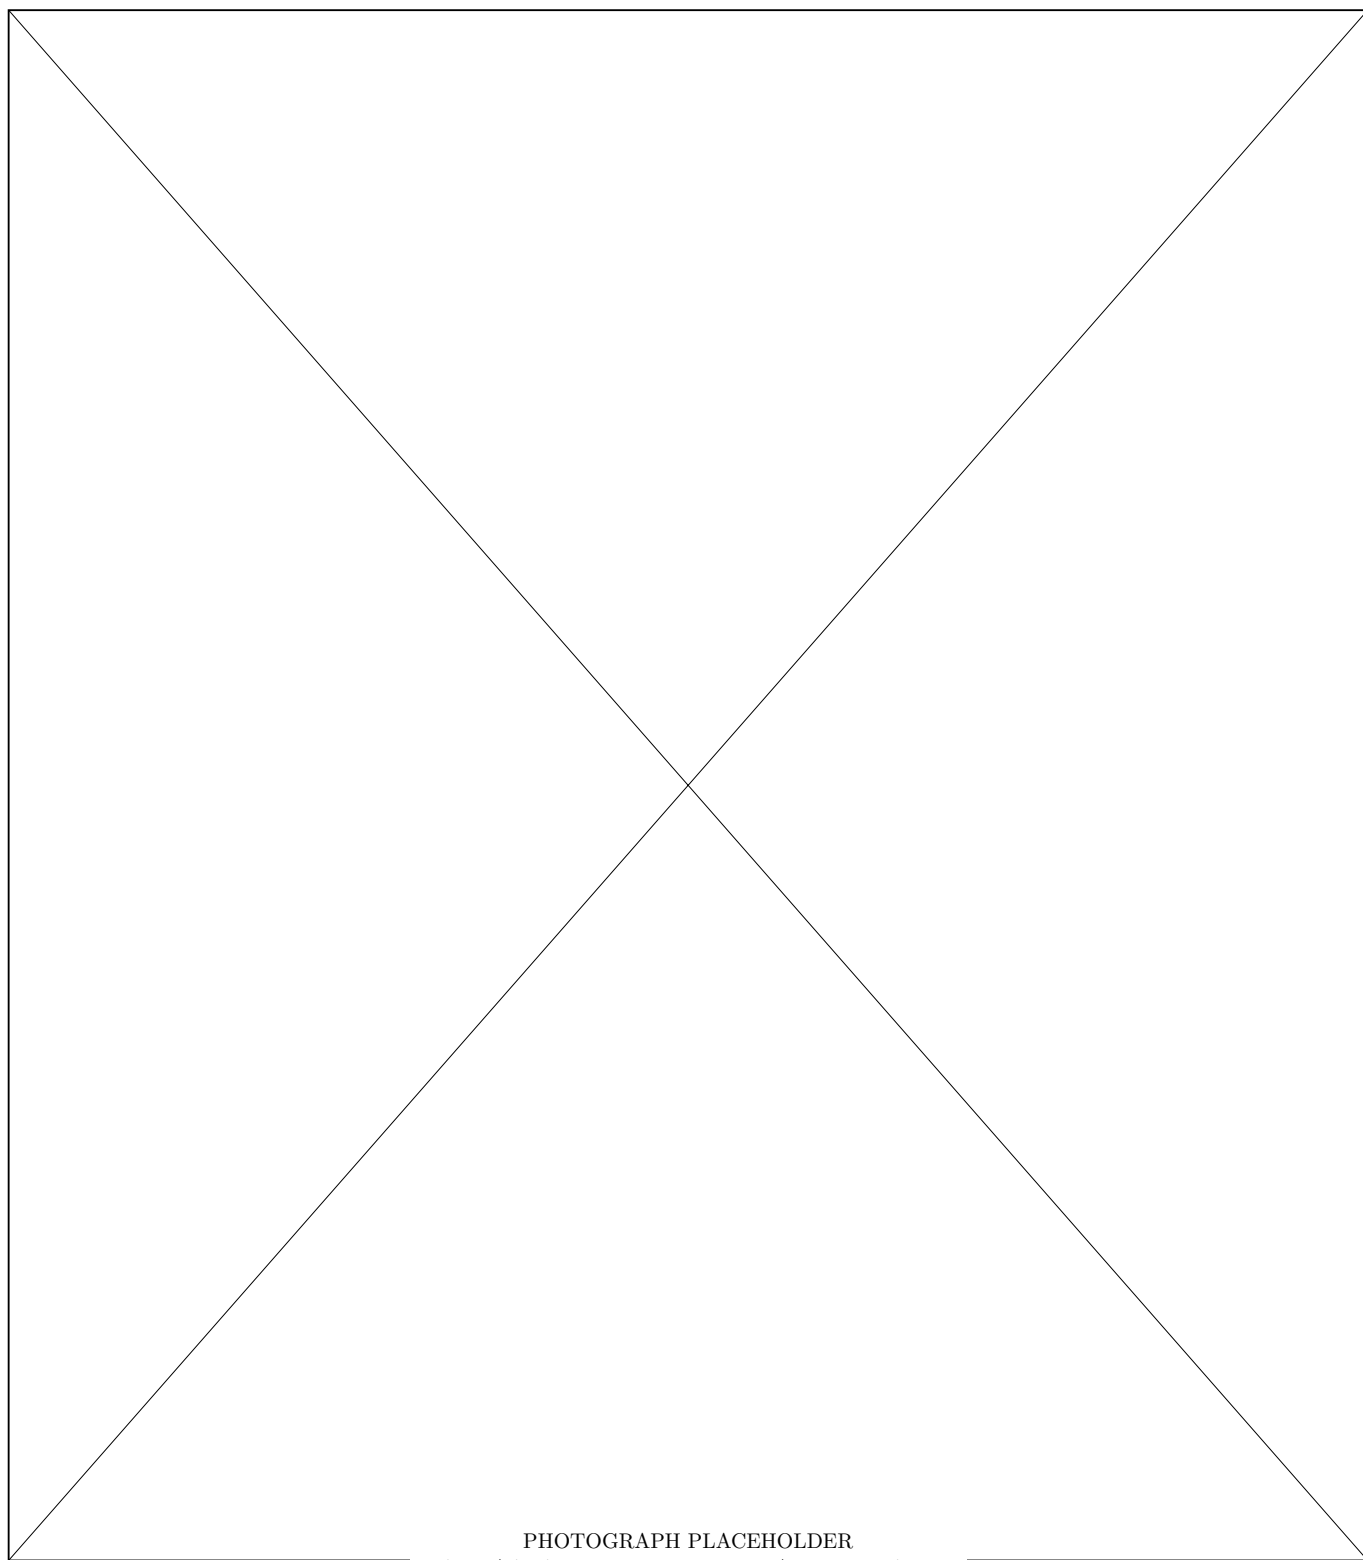

A person may appear in a photograph, make another photograph, speak

through an audio fragment, inhabit a place, invite another person, or enter at another stage. The relations are not interchangeable. The application therefore begins as a multiplex and grows by preserving difference.

THIS SPACE IS NOT EMPTY.

It has not been occupied yet.

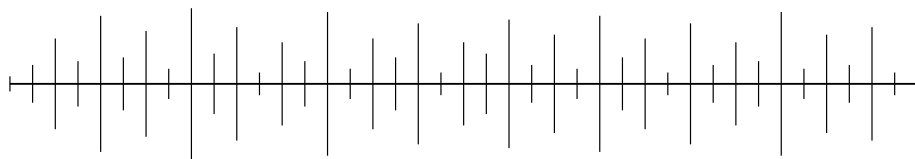

V_{n+1} ?

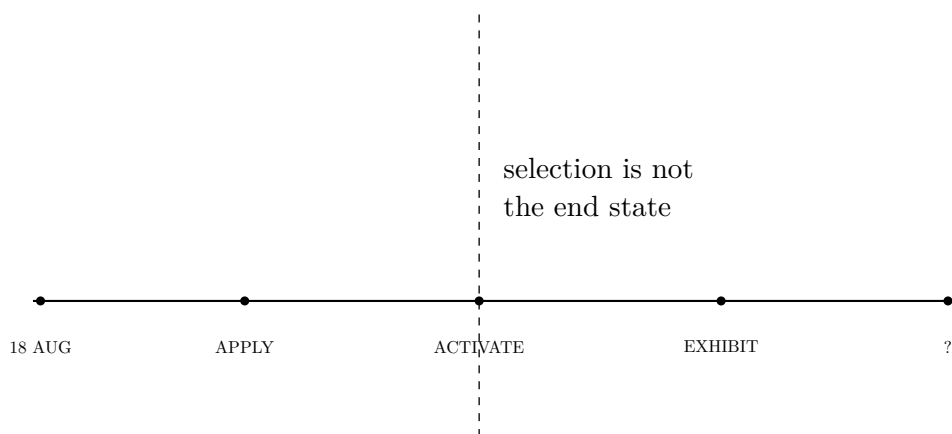

ANOTHER PRACTICE ENTERS. THE MEDIUM CHANGES WITH THE PERSON.

LISTEN.

Sound is not an accompaniment added to make a photographic exhibition multimedia. A person enters carrying a practice; the practice changes the topology of the work.

2. AN OPENING HAS CONSEQUENCES.

The trajectory shown here is deliberately provisional. The work asks

not only what an exhibition contains, but what an exhibition causes.

WHAT DOES THE WORK NEED?

STAGE	NECESSITY	STATUS
APPLICATION	photographs / voices / initial relations	ACTIVE
APPLICATION	short project text	ACTIVE
ACTIVATION	additional contributors	OPEN
EXHIBITION	wall / sound / encounter	NOT YET
PROPAGATION	unknown	+

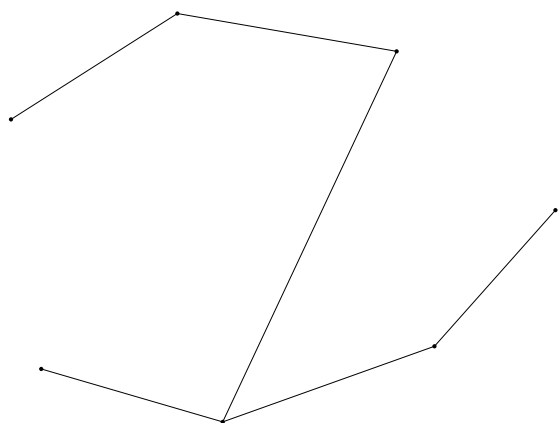

3. THE WORK GROWS BY RELATION.

$$G_0 = (\{+\}, \emptyset)$$

$$G_{n+1} = G_n + \text{one relation.}$$

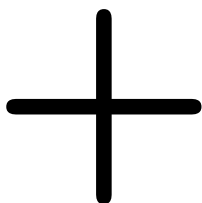

Temporary explanatory text. Each activation changes what can happen

next. The final configuration is neither prescribed nor arbitrary: it is constrained by the people, practices, places and acts of care that enter the system.
